

Environmental Policy

“EVERYONE HAS A RESPONSIBILITY TO ENSURE THEIR DAILY ACTIVITIES CONTRIBUTE TO A SAFE AND HEALTHY ENVIRONMENT”

We have a responsibility to safeguard the environment and reduce or eliminate, where possible, any adverse effect that we have on our world. It is our attitudes and actions that will influence our future environment.

The integrity of industrial waste management relies upon the strict ability to operate at the pinnacle of environmental safety.

KP Group Ltd is committed to acting in an environmentally responsible manner to prevent harm to our environment.

This Environmental Responsibility forms a component of our education and the way we work. Ecological awareness implemented at every stage of operation complements our benchmark for a safe environment with the most favorable impact upon the ecosystem.

KP Group’s ‘no compromise’ policy, from arrival on site to completion of disposal, ensures that health and safety interests for all concerned parties remain paramount.

We endorse excellence in the Environmental practices; and accomplish this by:

- Taking measures to ensure that we comply with all relevant environmental legislation and regulations and communicate with all involved parties at a local and regional level.
- Monitor and take preventative measures to ensure our activities do not pollute local water and land bodies.
- Monitor and facilitate training for new environmental issues and practices.
- Regularly review our Environmental Policy, Systems and procedures, in order to continually improve our environmental performance.
- Ensure that all waste removed off-site from our customers' sites is processed and directed to the correct facility for recycling and disposal.
